Objective

AI Engineer and Data Scientist with 4+ years of combined experience in Machine Learning, Statistical Modeling, and Applied AI Architectures across corporate R&D and academic research. Proven track record of designing scalable Generative AI systems (LLMs, RAG, Multi-Agent frameworks) on Google Cloud Platform (GCP) and deploying production-grade Computer Vision models. Strong software engineering background combining advanced Python, SQL (PostgreSQL, BigQuery), Full-Stack development (React, Node.js), and AI-powered dev tools (Cursor). Native in Portuguese, fluent in English (C2).

Core Technical Skills

- **AI & Machine Learning:** LLMs, RAG, Multi-Agent Systems, Computer Vision, Embeddings, Vector DBs, Prompt Engineering, Scikit-learn, PyTorch/TensorFlow.
- **Data Engineering & Cloud:** Google Cloud Platform (GCP), BigQuery, PostgreSQL, SQL, Data Pipelines, MLOps, MLflow, Model Evaluation & Governance.
- **Software Engineering & Web:** Python (Advanced), React, React Native, Node.js, Streamlit, RESTful APIs, Microservices Architecture, Docker, Git.
- **Developer Tools & Automation:** Cursor (AI Coding), n8n / Make (Low-Code/No-Code), VS Code, Linux.
- **Languages:** Portuguese (Native), English (C2 - Native Fluency).

Professional Experience

Instituto de Pesquisas ELDORADO | Data Scientist / AI Engineer (R&D)

May 2025 – Present | Campinas / Remote, Brazil

- Operated with full technical autonomy in corporate R&D, architecting end-to-end Machine Learning, Generative AI, and Computer Vision solutions.
- Engineered Generative AI PoCs utilizing Multi-Agent frameworks, Vector Databases, and RAG pipelines on GCP (BigQuery) for automated structured database querying.
- Developed a Multi-Agent AI automation for UI extraction and process integration, cutting manual regression testing time for QA teams.
- Architected multi-input/multi-output Computer Vision models and governed an end-to-end data pipeline for 40,000+ images in Python.
- Built interactive Streamlit analytical applications, accelerating scientific data validation workflows by 50%.
- Utilized Cursor for AI-assisted coding and applied MLOps practices (MLflow, Docker) for reproducibility, model tracking, and technical documentation.

Universidade de São Paulo (USP) | Data Scientist / Academic Researcher (FAPESP)

March 2019 – November 2021 | São Carlos, Brazil

- Led statistical modeling and data processing initiatives for complex experimental datasets under FAPESP funding.
- Built automated Python data pipelines for cleaning, Exploratory Data Analysis (EDA), and real-time model validation.
- Designed custom mathematical algorithms to quantify in-situ experimental metrics with statistical rigor.

LS Consultoria Júnior | Founder & Environmental Project Manager

August 2016 – December 2017 | Buri, Brazil

- Founded and directed a junior consulting company, managing corporate governance, team coordination, and client deliverables.

Key Projects

SOS Câncer de Pongaí App (Technical Lead)

- Developing a social impact mobile app using React Native, Node.js, and Python for NGO management, donation workflows, and volunteer registration.

arcadeHub (Legacy Modernization & Architecture)

- Modernized legacy Python/HTML/JS applications into a unified, responsive React SPA with Tailwind CSS, applying modular microservices architecture.

bookstack-ai & Computer Vision Hub

- Engineered a suite of open-source projects featuring personal library management with AI analytics and deep learning image recognition pipelines.

Education

B.S. in Systems Analysis and Development (A.D.S.)

Descomplica Faculdade Digital | December 2024 – June 2027 (Expected)

Advanced Data Specialization (Jornada de Dados)

Laboratoria Brasil | June 2025 – November 2025

Master of Science (M.Sc.) – Data Analysis & Statistics Focus (Physical Chemistry)

Universidade de São Paulo (USP) | March 2019 – December 2021

Bachelor of Science (B.S.) in Environmental Engineering

Universidade Federal de São Carlos (UFSCar) | March 2014 – December 2018
